Information Security Awareness Tactical Training for LACCD Executives

Patrick Luce, LACCD CISO
Version 1.0 April 8, 2021

Training goal

The purpose of this training session is to provide LACCD executives with awareness of specific information security risks they face, and how they can help protect themselves, their staff, their students and the district.

Agenda

- Executives as targets
 - Why and how executives are targeted by attackers, and how to protect yourself
- Executives as bait
 - How attackers leverage executives to lure staff into compromising security, and how to protect your employees
- Questions and Answers

Why are executives targets?

- Attackers are criminals after money
 - Extortion (Ransomware)
 - Theft (SSNs, Credit Card Numbers, etc.)
 - Fraud (Hijacked financial accounts, fraudulent invoices or payments, etc.)
- Executives have more access to more money
 - Access to financial accounts and/or sensitive data, authority over business operations, etc.
- Larger payouts merit more attention and investment
 - Executives draw more skilled attackers who invest more time and energy
- Many executives (tend to) make themselves easy targets
 - Public figures, require constant connectivity, time constraints

How are executives targeted?

GOOGLE

DEMONSTRATION

Most attacks begin with user communications

- Attackers begin by sending fraudulent emails, text messages or phone calls to induce people to:
 - Install malware (for ransomware or keystroke logging)
 - Provide personal information or account login information (to steal data or transfer funds)
 - Induce someone to send money to a fraudulent account or user
- These communication techniques have common names:
 - Phishing: General in nature
 - Spear Phishing: Targeted attacks from an attacker who performed research
 - Whaling: Spear-phishing attack of a high-level employee
 - Business Email Compromise: Induce user to commit wire fraud
 - Bogus invoices, CEO impersonation, Attorney impersonation, etc.

Side Note

DEMONSTRATION

CREDENTIAL STUFFING

<https://haveibeenpwned.com/>

How to protect yourself (and the District)

- Be mindful of the information you choose to make public (both personal and District information)
- Always keep applications and antivirus up to date (don't delay the updates)
- Use a different password (or passphrase) on every single account, and change passwords periodically.
 - Use passphrases instead of words
 - Use a password database if necessary
- Never share your password with anyone for any reason, especially for your email account or sensitive systems (i.e. SAP or SIS)
- Never ask for anyone's password for anything, and never send passwords via email.
- Be vigilant with every email, text or phone call before responding

Email/text/phone vigilance

- The message came from a person you know who identifies themselves in a way that you understand
 - They have a name, caller ID matches, etc.
- You are an appropriate person to be contacted for the purpose of the message.
- The person addresses you in a way that you understand
- The domain name of the email sender makes sense to you, and matches the domain name in the link
 - Hover over all links before clicking and compare the domain
 - Look at the link again in the browser after clicking the link
- The grammar and tone realistically reflect the organization who is communicating with you
- IF YOU AREN'T SURE, REPORT TO PHISHING@LACCD.EDU

A real email...

The ultimate attack...

From: Diane Ringading <RINGADINGDR@LATTC.EDU>

To: Smith, Denice A <SMITHDA@LATTC.EDU>

Subject: REQUEST

Hi Denice,

I am hosting a luncheon for potential donors and forgot my CalCard. Can you pay the lunch invoice in the link below with my CalCard ASAP?

<https://larrysdeli.com/invoice3927265>

Thanks Denice!

Diane Ringading

Vice President of Important Things
Los Angeles Trade-Technical College

Why?

DISCUSSION

What would lead an employee to pay the invoice?
How could it be prevented?

Why security breaks down...

Possible reasons the payment is made	How we can prevent it
The employee thought the email was real	Awareness training, phishing training
The employee had access to the CalCard	Be diligent with financial account numbers of any kind
The employee has high implicit trust	Encourage employees to scrutinize unusual financial requests, especially if they are from you

Compromise of an executive account can be devastating

- Use complex passwords or passphrases for your LACCD accounts (particularly email, SAP and SIS)
- Do not give your password(s) to any LACCD employee at any time, including your administrative assistant
- Encourage your staff to be wary of unusual requests from you, particularly that involve money or sensitive information
 - “Is this something he or she would normally ask me to do?”
 - Encourage them to call and ask

Executives set the tone for their employees

- Communicate with your staff that you (and your executive team):
 - will never discuss District business of any type from a non-District email address
 - will never ask for a financial transaction to be committed via email or text under any circumstances, including from District phones and email addresses
 - Will never share a password to any account for any reason, and will never ask them for a password for any reason
 - Require all employees to follow all District security rules at all times
- Assure your employees attend mandatory information security training

Avoid self-inflicted wounds

- A single lost spreadsheet with 500 or more social security numbers is a public event
- Scrutinize access requests for any District system that allows an employee to generate personal data for multiple students or employees
 - Beware of “occasional need”

Report Incidents

- Report anything you believe is suspicious, and encourage your employees to do the same
 - Suspicious email?: phishing@laccd.edu
 - Security incident?: infosecincidents@laccd.edu
 - Questions?: infosecrequests@laccd.edu

Dear OIT Management Team,

Thank you for testing our new Information Security Awareness Course for all LACCD employees. Most of you should have received an invitation to the course via email. You can access the course from the invitation, or navigate to <https://ilearn.laccd.edu> and click "Courses", then "Infosec_Development."

The course should take approximately 45 minutes. Please let me or George know of any issues or suggestions by the end of day next Wednesday, June 9. We will make any final edits and publish the course by the end of next week.

Please note I had an issue enrolling Ed, Andy, Ivan and Kirk. I will follow up with the SIS team to get you enrolled ASAP.

Thank you for your support in helping us to roll this out, and have a great weekend!

Best,
Patrick

DATE: July 14, 2021

SUBJECT: Mandatory Information Security Awareness for All Employees

The LACCD Board of Trustees has adopted Board Policy 3720, Computer and Network Use, to assure that all who access District computers and networks, use those resources responsibly.

The LACCD Office of Information Technology (OIT) has developed Information Security Awareness appropriate for all employees, and integrated it with our Canvas Learning Management System. By completing this forty-five-minute introduction, employees will gain understanding of current threats to the District's computing systems and information, and their role in helping to protect the District and our students, faculty and staff. Employees will also acknowledge that they have read, understand and agree to comply with Board Policy 3720 and the associated procedures outlined in Administrative Procedure 3720.

On August 4, 2021, all District employees, including full-time and adjunct faculty, staff and student-workers that had/have an active employee assignment for spring or summer of 2021 will be sent an introductory email with guidance for accessing the content. Please inform all your staff that participation is mandatory and request that they complete it prior to October 15, 2021.

Should you or any members of your staff have any questions regarding information security awareness, please email infosecrequests@laccd.edu.

Dear Colleagues,

October is National Cybersecurity Awareness Month! Please review the attached flyer to help assure we all stay Alert, Informed, and CyberSmart!

Whenever in doubt, please reach out to our Information Security Team at infosec@laccd.edu with any questions or concerns you may have about Cybersecurity.

Thank you for all you do to help protect our information resources.

With Best Regards,

Patrick Luce

Chief Information Security Officer
Information Technology

OCTOBER, 2021 IS

NATIONAL CYBERSECURITY AWARENESS MONTH

Do Your Part; Be CyberSmart

Every day, technology helps us use information provide educational services to our community. However, the same technology has also created a marketplace for hackers to seek and steal sensitive information. The LACCD Office of Information Technology encourages all LACCD employees to help secure our information by keeping aware of threats to the security of information, and our shared role in keeping data safe.

Be Alert

Phishing attacks use malicious images or links in websites and emails to infect your computer or lure you to provide your login credentials to sensitive data. For tips on recognizing phishing, visit [NCSAM Phishing](#).

BE INFORMED!

 LACCD provides mandatory information security awareness information for all LACCD employees. If you haven't already completed it, go to ilearn.laccd.edu and click "Information Security Awareness 2021" to start.

Let Us Help

The LACCD Information Security Team is available to assist with any questions you may have about how to keep our computers and information safe. Contact us at infosec@laccd.edu.
